INTRODUCTORY.

In presenting to our patrons and the general public this edition of the Cambridge Directory — No. 39 of the regular series — we would express the hope that it may meet every reasonable expectation. It is scarcely necessary to state that the difficulties and expenses attending the compilation of such a work are very great, and not to be appreciated by any one unfamiliar with the business. The Directory business, like every other, is peculiar to itself.

It has been ous sincere purpose and earnest endeavor to do our work faithfully, and in return, may we not ask the generous support of an undivided community? We call special attention to the advertising department in this edition, which will be found to be unusually large.

Our sincere thanks are extended to all who have aided our canvassers in the collection of information for the present number.

The following synopsis is appended:

Names in Directory 1890	29,647
" " " 1889	27,714

We remain very respectfully,

W. A. GREENOUGH & CO.,

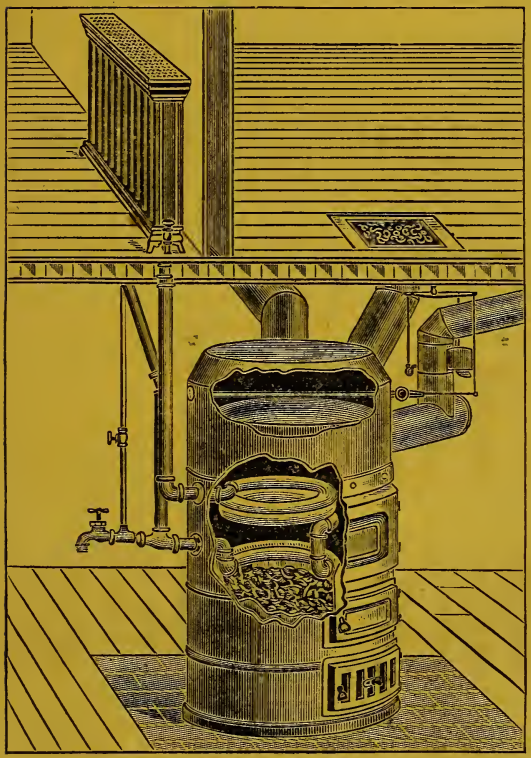
TRASK'S
Hot Water System.



Have you any rooms or halls at your residence, that you would like heated? If so, try our system of Hot Water Heating, which we warrant to work perfectly, or no charge, — requires no extra fire, and will prove a saving of coal. In connecting our hot water system in the winter months we will not deprive you of heat from your furnace over two or three hours at the longest.

There is no heat so healthy as that produced by hot water. Our system of heating one, two, or even three rooms, by a circulation of hot water from any hot air furnace, is the latest thing of thing of the nineteeth century.

It is well known that there is a great deal of surplus heat around a hot air furnace, and we claim that the double coil we insert in the hottest part of a furnace helps greatly to utilize the heat and does not detract the heat from your hot air pipes.

We are satisfied that no one who understands the principles of heating can contradict us, when we assert, that after hot air furnaces are run to their fullest capacity to obtain the desired heat in some rooms, and even then are unable to do it, that the heat from the forced furnace poisons the air, injures the furnace greatly, to say nothing of the extra cost of coal.

There is a growing dissatisfaction among nearly all persons using hot air furnaces.

We claim that the proper way to heat a house is, to burn your coal slowly and the air you receive from it is healthy. We claim that a furnace will last twice as long, and that the consumption of coal is far less under our system of heating. There is nothing complicated about it, requires no care, and will last as long as an ordinary furnace. We warrant our hot air system to heat any room we undertake, or where we place our radiator. We can make all connections to your furnace, and not deprive you of heat over three or four hours. We hold ourselves in readiness to give estimates of heating any apartments in your residence or place of business.

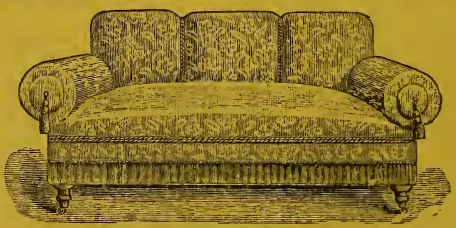
THE HARVARD SOFA BED.



This is the latest and unquestionably the most desirable

FOLDING BED

IN THE MARKET.

As a **SOFA** it serves as a useful and ornamental piece of parlor furniture, looking in every respect like an ordinary sofa, and being equally as comfortable. As a **BED** it is equal to the best, having a soft spring and hair mattress, as desired, etc. It is automatic—a child can change it in a second,—and the bed clothing folds with the bed. It can be made any style or size. My prices are very reasonable, my workmanship of the best.

Orders by mail carefully attended to. Discount to the trade.

Instructions to Key Holders.

Alarms to be given from the box nearest the location of the fire.

Do not give an alarm for a fire seen at a distance, unless assistance is called for.

To give an alarm, open the door, pull the hook to the bottom of the slot once, and let go. Each box contains a small bell, which, if heard before you pull, indicates that an alarm has been previously given, and by listening at the box, you will learn the number of the box

from which the alarm was given, but in no case will you pull the box while the alarm is striking. After giving the alarm, remain at the box, so as to direct the firemen to the fire. Be sure that you lock the box before leaving it.

Citizens are requested to inform themselves where keys to the signal boxs are kept, signs suitably inscribed being placed over each box, giving the requisite information.

Instructions to Firemen.

First alarm will be given by striking *three* or more rounds.

Second alarm will be given by repeating the first.

General alarm will be given by striking *three blows* on the gongs and bells.

In cases where hook and ladder companies only are wanted, the call will be given by striking *five blows.*

Companies not required to respond to first or second alarms will be notified of the extinguishment of a fire by *two blows* on the gongs, that their services will not be needed, and that orders have been given to "make up." Should an alarm be given from any box while a portion of the departement is engaged at a fire, the apparatus not in service will respond.
